上海建桥学院课程教学进度计划表 Teaching Schedule

一、基本信息 Basic Information

课程名称 Course Title	计算机系统与网络技术 Computer System and Network Technology				
课程代码 Course Code	2140019	课程序号	2780	课程学分/学时 Course Credits/ Hours	3/48
授课教师 Professor	朱曙锋 Shufeng Zhu	教师工号 (ID)	11046	专/兼职 Full/Part Time	专 Full Time
上课班级 Class	数媒技术(国 教) B23-2	班级人数 Number of Students	39	上课教室 Classroom	计算机中心 326 和 315 Computer Room 326 and 315
答疑安排 Q&A Schedule	星期三下午 5-6 节课 13: 00-14: 00 on Wednesday				
课程号/课程网站					
选用教材 Text Book	COMPUTER NETWORKING Top-down Approach, James F. Kurose, Keith W.Ross, PEARSON, Eighth Edition				
参考教材与资料 Bibliography	An Introduction to Computer Networks,Release 2.0.6,Peter L Dordal 计算机网络(第 7 版),谢希仁				

二、课程教学进度 Teaching progress

周次	教学内容	教学方式	作业
Week	Topics	Methods	Assignment
1	Chapter 1 Computer Networks and the Internet 第 1 章 计算机网络和因特网 What is the Internet? What are protocols? Network edge: hosts, access networks, and physical media. Network Core: Packet/Circuit Switching, Internet Architecture. Safety. Protocol layer, and service model 什么是因特网? 什么是协议? 网络边缘:主机、接入网络、物理介质。网络核心:分组/电路交换,互联网结构。安全。协议层、服务模型。	Lecture and Discussion 授课与讨论	

		Ι	
2	Chapter 2 Application Layer 第 2 章 应用层 Principles of network applications, Web and HTTP, E-mail, The Domain Name System DNS, Video streaming and content distribution networks 网络应用原理, Web 和 HTTP, 电子邮件, DNS, 视频流和 内容分发网络.	Lecture and Discussion 授课与讨论	Homework 1 家庭作业 1
3	用 Apache 服务器软件搭建一个 Web 网站。 Setting a Web Site in the Apache	Lab	
5	Chapter 3 Transport Layer 第 3 章 运输层 Transport-layer services, Connectionless transport: UDP, Principles of reliable data transfer. Connection-oriented transport: TCP 传输层服务, 无连接传输: UDP, 可靠数据传输的原则, 面 向连接的传输: TCP	Lecture and Discussion 授课与讨论	Homework 2 家庭作业 2
6	Chapter 4 Network Layer 第四章 网络层:数据面 Network Layer Overview, How Routers Work, Internet Protocol. 网络层概述,路由器工作原理,互联网协议。	Lecture and Discussion 授课与讨论	
7	Chapter 5 The Network Layer: Control Plane 第 5 章 网络层:控制面 Routing Algorithms, Intra-AS Routing in the Internet: OSPF, ICMP: The Internet Control Message Protocol 路由算法,互联网中的 AS 内部路由: OSPF,ICMP:互联	Lecture and Discussion 授课与讨论	Homework 3 家庭作业 3
8-9	用 Cisco Packet Tracer 对路由器就行模拟配置。 Setting Routers in Cisco Packet Tracer	Lab	
10	Chapter 6 Link Layer & LANs 第 6 章 链路层和局域网 Introduction to the Link Layer, Switched Local Area Networks, Data Center Networking 链路层概述,交换局域网,数据中心网络	Lecture and Discussion 授课与讨论	Homework 4 家庭作业 4
11-12	用 Cisco Packet Tracer 对交换机就行模拟配置。 Setting Switchers in Cisco Packet Tracer	Lab	
13	Chapter 7 Wireless & Mobile Network 第 7 章 无线网络和移动网络	Lecture and Discussion	Homework 5 家庭作业 5

	Overview of Wireless and mobile networks, WiFi:802.11 Wireless LAN, Cellular Internet Access, mobile IP	授课与讨论	
	无线网路和移动网路概述,WiFi:802.11 无线局域网,蜂窝		
	互联网接入,移动通信 IP		
	Chapter 8 Security in Computer Networks		
	第8章 计算机网络中的安全		
	Network security, cryptography principles, message integrity	Lecture and	
14	and digital signature, network layer security, making wireless	Discussion	
	LAN secure, operational security	授课与讨论	
	网络安全,密码学原理,报文完整性和数字签名,网络层安		
	全性, 使无线局域网安全, 操作安全		
	Students will present their project which they work on in the		
	semester. The Presentation will include PPT, Recorded Video		
15	and Thesis with 1200 words.		
	学生将展示他们在学期中从事的项目。演讲将包括 PPT,录		
	制的视频和论文, 1200 字。		
	Students will present their project which they work on in the		
	semester. The Presentation will include PPT, Recorded Video		
16	and Thesis with 1200 words.		
	学生将展示他们在学期中从事的项目。演讲将包括 PPT,录		
	制的视频和论文, 1200 字。		

三、评价方式以及在总评成绩中的比例 Assessment Index & Weightage

总评构成(X) Grading Computation	评价方式 Assessment Index	占比(%) Weightage(%)	
X1	期末考核: 个人项目报告	50%	
Ai	Final assessment: personal project report	3070	
X2	过程考核:个人作业	20%	
AZ	Process Assessment: Individual Assignments	2070	
X3	过程考核: 3 个实验报告	20%	
A3	Process assessment: 3 lab reports		
X3	过程考核: 课堂表现	10%	
AS	Process Assessment: Classroom Participation	1070
